SENIOR FULL-STACK ENGINEER

Senior Full-Stack Engineer with 14+ years of experience building, modernizing, and supporting production web applications across SaaS, finance, e-commerce, nonprofit, and SEO-driven platforms. Hands-on expertise in React, TypeScript, C#/.NET, Laravel/PHP, Node.js, WordPress, PostgreSQL, SQL Server, AWS, REST APIs, CI/CD, and automated testing. Experienced in stabilizing inherited systems, delivering end-to-end features, building reusable development frameworks, and applying AI-assisted development and QA to accelerate software delivery.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, Next.js, React Native, JavaScript, Tailwind CSS, HTML5, CSS3, SASS, MUI, WordPress
- **Backend & APIs:** C#/.NET, ASP.NET, Laravel, PHP, Node.js, Express, REST APIs, GraphQL, Entity Framework, Eloquent
- **Data & Cloud:** PostgreSQL, SQL Server, MySQL, MongoDB, AWS EC2/S3/RDS/IAM, Cloudflare, WP Engine, Docker
- **Delivery & Quality:** Git, GitHub, GitLab, GitHub Actions, CI/CD, Playwright, Cypress, Jest, Lighthouse, Figma, Stripe, Postmark, Google Maps API, Technical SEO, Claude Code, Codex

PROFESSIONAL EXPERIENCE

Legal Leads Group — On-site

Web Developer | Dec 2025 – Present

- Build and deliver 5–6 client websites per month from Figma designs, using WordPress, PHP, JavaScript, responsive UI, custom interactions, and SEO-focused implementation.
- Architected an internal component-driven WordPress development framework adopted across approximately 50 client websites, standardizing reusable templates, content structures, UI components, and administrative tooling.
- Built scalable parent/child page systems for locations, services, blogs, and other content types, enabling SEO and content teams to create pages independently while preserving intended layouts, behavior, and technical SEO.
- Developed AI-assisted development and QA workflows using Claude Code and Codex to accelerate implementation and validate SEO, performance, metadata, headings, content, security, and site quality.

- Designed and demonstrated an alternative SEO-site delivery workflow using Astro, GitHub, Pages CMS, and Cloudflare, rebuilding an existing WordPress site to validate a lower-overhead approach to development, content management, and deployment.

Host Guest Platform — Remote

Full-Stack Developer | Jun 2025 – Feb 2026 (Contract)

- Took technical ownership of an incomplete outsourced homestay marketplace, establishing local and staging environments, AWS EC2 deployment, IAM configuration, GitHub-based development workflows, and GitHub Actions CI/CD.
- Rebuilt and expanded the platform using Laravel, PostgreSQL, PHP, HTML, Tailwind CSS, and AJAX, implementing host and guest onboarding, profiles, property listings, search and filtering, map-based functionality, controllers, models, APIs, and database migrations.
- Implemented core platform integrations including Stripe payments, Postmark transactional email, and an internal host-to-guest messaging application deployed through Cloudflare.
- Built the administrative dashboard for user management, document handling, approvals, and marketplace operations while translating Figma designs into the customer-facing experience and replacing the inherited Bootstrap UI with Tailwind CSS.
- Identified a delivery-capacity risk, brought in an additional developer, and coordinated work to deliver the negotiated MVP by an investor deadline; the company subsequently secured funding.

The Teen Project Inc. — Santa Margarita, CA

Full-Stack Developer | Sep 2024 – May 2025

- Cleared an inherited backlog of approximately 40–50 Jira issues across the patient-facing application and internal admin platform, resolving UI, functional, and technical-debt issues ahead of a critical funder presentation and HIPAA-readiness deadline.
- Developed and enhanced features across React Native, Next.js, C#, Entity Framework, and PostgreSQL, working directly with database schemas, APIs, backend logic, and reusable Tailwind UI components.
- Built a hierarchical housing and bed-management system for assigning, booking, and swapping houses, rooms, and beds, applying object-oriented design principles and implementing a drag-and-drop interface for operational users.
- Implemented location and fuzzy-search functionality using Google Maps-related APIs, and extended the onboarding system with database-backed first-login tracking to identify new users and drive required onboarding workflows.

Megasys Inc. — Anaheim, CA

Software Developer / DevOps | Jan 2020 – Sep 2024

- Developed and maintained features for a multi-tenant auto-loan servicing platform using React.js, C#/.NET, SQL Server, REST APIs, AWS, and GitLab, working across frontend, backend, database, and production support.

- Contributed to the modernization of legacy PHP/JavaScript systems into a React and .NET architecture, implementing UI components, API endpoints, business logic, Entity Framework data access, and supporting database changes.
- Built and modified financial workflows and third-party integrations, including Stripe and PayPal, while troubleshooting production defects and delivering ongoing feature requests across the servicing platform.
- Worked directly with SQL Server on queries, schema changes, reporting, and application data requirements supporting multi-tenant loan-servicing workflows.
- Took ownership of the application's Playwright-based end-to-end UI testing flow, expanding automated regression coverage and improving confidence in releases and QA validation.

Absolute Exhibits — Tustin, CA

PHP / WordPress / WooCommerce Developer & IT Specialist | 2019 – 2020

- Developed and maintained custom WordPress and WooCommerce systems supporting client-facing experiences and internal business operations.
- Integrated third-party logistics APIs to automate fulfillment and order tracking and resolved critical reporting, email-template, and attachment-delivery failures.
- Supported AWS EC2 environments, Linux automation scripts, deployments, infrastructure maintenance, code review, and production troubleshooting.

AdIQ — Costa Mesa, CA

Web Developer / SEO Specialist | Feb 2016 – Sep 2019

- Built SEO-driven WordPress platforms, custom plugins, CMS integrations, automation tools, and scraping/analytics systems for keyword research and lead-generation workflows.
- Increased client search visibility by 25% through technical SEO, site-performance optimization, and implementation improvements.
- Reduced content-management workload by 80% through custom tooling and workflow automation.

Various Companies

IT Specialist / Web Developer / System Administrator | 2012 – 2016

- Developed and maintained PHP, WordPress, and Joomla websites
- Built custom themes, plugins, and extensions
- Provided infrastructure, hosting, and network administration
- Automated system maintenance and monitoring
- Managed deployments and security compliance

EDUCATION

Certificate — Full Stack Web Development

University of California, Irvine | Jun 2024 – Dec 2024

- Focused on JavaScript, React, Node.js, SQL, MongoDB, Python

- Led project teams across major coursework
- Specialized in API design, GraphQL, testing, and CI/CD
- Hands-on experience with Docker and Agile workflows
